

10 Facts about **EDGE to EDGE**

EDGE TO EDGE™ gives MAXIMUM crop protection.

Manufactured using Tama's unique 'Edge to Edge' technology, which guarantees full bale coverage from all round balers and so produces the perfect bale, everytime.

1

2

SAVES you TIME

Tama's longer length rolls significantly reduce wasteful 'down-time' by reducing the number of roll changes required.

MONEY

The longest length netwrap available, so SAVES you MONEY. A longer roll means more bales per roll, reducing down time to re-load and re-stock rolls, as well as other savings in fetching and carrying.

3

4

CONSISTENCY

Tama Net Edge to Edge™ rolls are consistent in length, strength and especially consistent working in the baler-trouble free, meaning less operational worries.

5

ROLL END WARNING

Every roll of Tama Net Edge to Edge™ contains a visible Roll End warning stripe, which shows the end of the roll is approaching. This shows as the last 70 metres of the net is reached, allowing the operator to prepare for a roll change and avoid baling without net in the baler.

ZEBRA® SYSTEM

As well as producing the 'perfect bale', Tama Net Edge to Edge™ also features the unique ZEBRA System roll pattern. The asymmetrical striping pattern of TamaNet Edge to Edge gives the operator a very clear 'left-right' indicator when loading the net roll. The ZEBRA System is also indicates correctly which way to unroll the bale when feeding or bedding.

6

7

CARRY HANDLES

Every roll of Edge to Edge™ is fitted with purpose carrying handles, to assist the operator in handling and carrying the roll. It is always recommended that a minimum of two people handle rolls.

8

LESS WASTE

Much more net on a roll means fewer rolls required for the same bale count, giving a significant saving in waste packaging from your season's baling. In fact, a 40% saving in waste packaging.

TRANSPORTATION

The longest length rolls on the market mean more metres of net in every roll. This means for every pallet and truck-load of net, many, many more bales can be wrapped for the same storage volume.

9

10

BALES SPEAK LOUDER THAN WORDS..

After your field has been harvested, the tractor engines silenced and all the machinery is back in the shed, what remains are the PERFECT BALES made with your TamaNet Edge to Edge. Stripes mean QUALITY - let the bales speak for themselves.
