

TamaTwine+™

IMPAX®
TECHNOLOGY INSIDE

Tama
FARM GROWN SOLUTIONS

THE NEXT GENERATION HAS ARRIVED

Tama is proud to introduce the next generation of baler twine with IMPAX® Technology.

IMPAX® Technology twine is formulated to provide unparalleled baling efficiency and built to withstand the shock load exerted on the twine during bale ejection.

This characteristic guarantees secure knots and unrivalled knot performance.

TOTAL WORKABILITY

IMPAX® a revolutionary, patented technology achieving the impossible - strong, smaller diameter twine providing all the benefits:

Facilitates use within the knotting system of the baler, reduces in-season maintenance and minimizes downtime, thanks to far fewer mis-ties and broken bales.

All these lead to an increase in baling efficiency throughout the season, allowing the operator to concentrate on getting the job done. **THAT'S TOTAL WORKABILITY.**

Impax product range	Comments
TamaTwine+ 4160/700 HD	For HD balers in exceptional conditions
TamaTwine+ 4700/600 HD	For HD balers in extreme conditions
TamaTwine+ 4500/500	For standard density balers in high conditions
TamaTwine+ 4800/450	For standard density balers in standard conditions

KNOT PROTECTION

Peace of mind

SUPERIOR KNOTTING PERFORMANCE

Less downtime

UNMATCHED BALER OUTPUT

More bales

RECYCLABLE & SUSTAINABLE

Reduced carbon footprint

LESS WEAR & TEAR

Major savings

TESTIMONIALS FROM THE FIELD

PAUL PETERSSON

Manager
Tranbergs Jordbruks AB

The twine worked superbly,
with no broken bales."

MATHIEU LEROY

Baler driver
SARL DUNEAU

Considerably reduces the time
spent reloading the machine!"

YANNICK DUNEAU

Manager
SARL DUNEAU

The new twine made it possible
to safely move up to 100%
performance on our baler."
